Reference Letter – Trixx International

To whom it may concern,

Trixx International was appointed to produce, deliver and install all lighting and stone granite plates for the Sheraton Poznan / Poland, Sheraton Sopot / Poland and Sheraton Algarve – Luxury Collection / Portugal.

During the project phases, Trixx International was requested to submit product proposals for custom-made lights but also to look into alternative goods to ensure contract usability.

Mr Pawel Paszkiewicz/Trixx International performed his duties in a very professional manner, and remained focused and objective even under pressure. When on-site the cooperation and communication with Mr Paszkiewicz`s team and our procurement personnel were outstanding and he was always ready to assist as required.

We found him to be precise, flexible, dedicated and with an enthusiasm which ensured he managed to solve any problems. He assisted us within his scope of commodities, to ensure that the openings of the hotels were successful and on time.

I have full confidence in Trixx International and I would therefore recommend its products and services to any future project.
